Date: March 25, 2020

Any person who has traveled to or from Kansas City (including Jackson County in Missouri, Johnson, and Wyandotte counties in Kansas) on or after March 19, 2020, we are asking you to quarantine yourself because we have determined that you may have or have been exposed to Coronavirus.

Quarantine means that you should not come into contact with other people. It protects your health and the health of others.

Based upon what we now know about Coronavirus, you need to stay in quarantine for 14 days. We will be checking in on you and will let you know when it is safe for you to return to your normal activities.

If you have traveled to this area, please call Trego County Health Department at 785.743.6348.

It is very important that you comply with this request for mandatory quarantine. Your health and the health of others depend upon it.

If you do not comply with this mandatory quarantine, we may issue an order enforced by law enforcement, to assure your compliance.

Thank you for your cooperation and help during this public health emergency. Call the health department to find out how your basic needs for items such as groceries or medication can be met while you are quarantined.
